

# Reduce Your Electricity Bill Minimum 5 - 20%

**RECOVER** YOUR HIDDEN  
**ELECTRICAL LOSSES**

Verified on Your Meter. Zero Risk. No Hidden Fees.

Potentially reduce certain electrical losses — subject to verified on-site measurement. Individual results vary.

Introducing the C-Results™ Energy Savings System —  
a breakthrough in electrical loss recovery technology.

C-Results™

THE CORE QUESTION

**What if you could reduce certain electrical inefficiencies — verified on your meter before payment?**

**No Machine Changes**

*Your equipment stays exactly as-is.*

**No Cable Changes**

*Zero rewiring. Zero downtime.*

**No Breaker Changes**

*Your infrastructure is untouched.*

**10+ YEARS**

**of Continuous Savings**

# You Pay Nothing Unless We Deliver

Our Guarantee

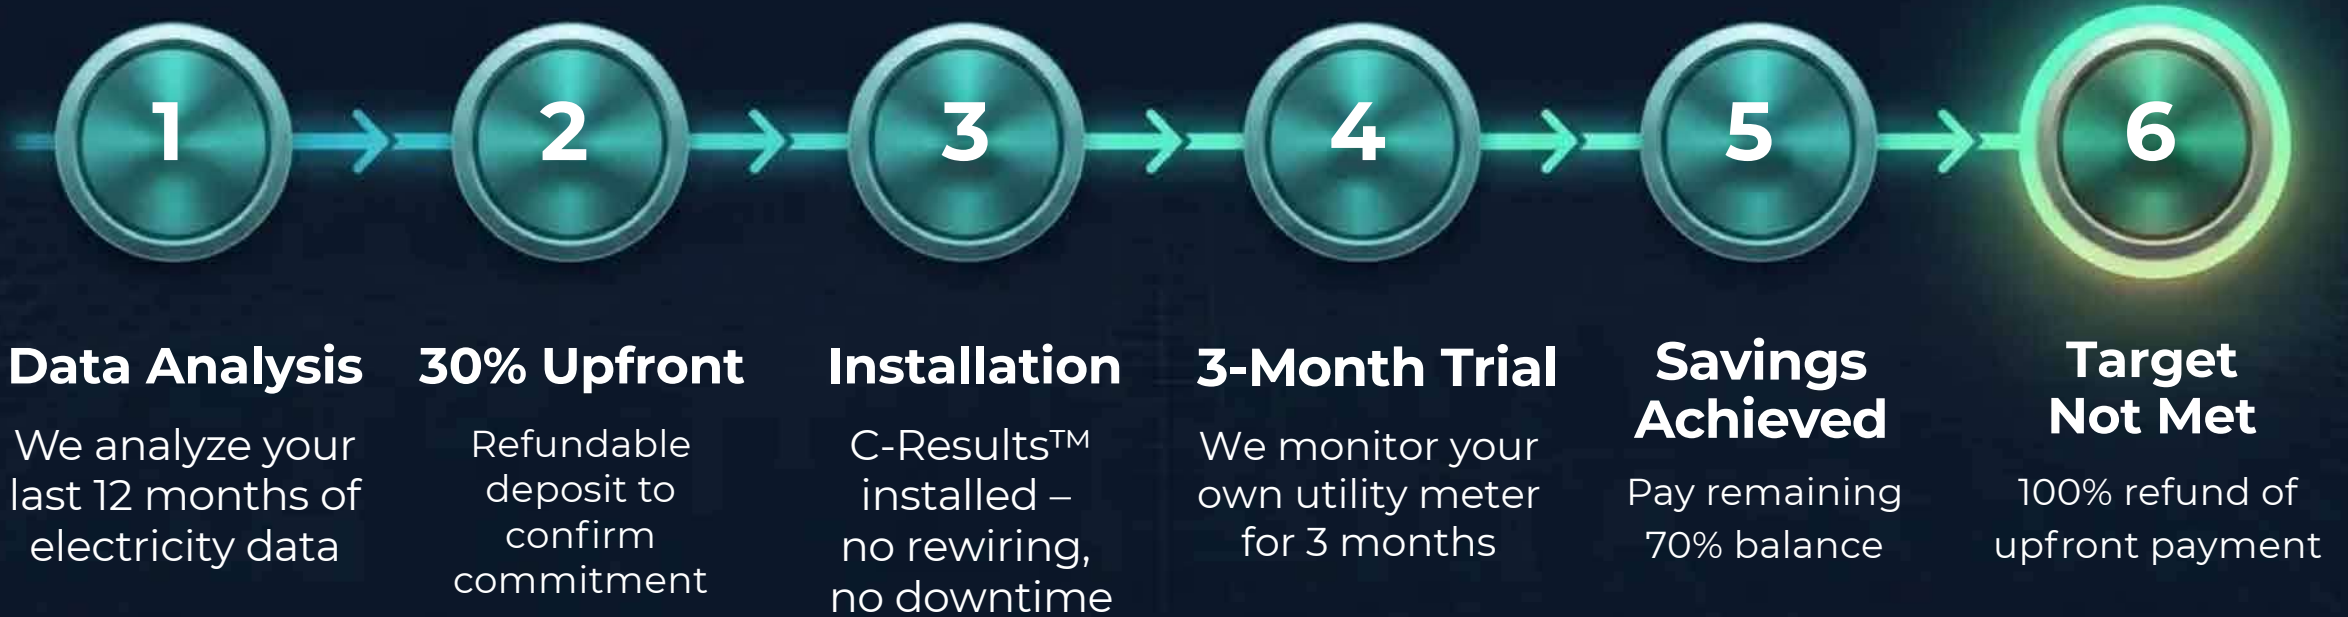

We do not ask you to trust our claims.  
We ask only that you let your own meter decide.

 If pre-agreed savings target is NOT met during trial period — FULL REFUND of upfront payment, subject to terms.

# Simple. Transparent. Performance-Based.

## How It Works

HIDDEN LOSSES IDENTIFIED

# THE SILENT PROFIT DRAIN

Poor power factor increases apparent power (kVA). If your utility bills kVA or applies power factor penalties, you may pay for current that does no useful work.

Where your electricity bill is silently bleeding — and why it's invisible on your meter.

## POOR POWER FACTOR

Draws current that does no useful work — you pay for energy your machines never actually use.

## VOLTAGE INSTABILITY & HARMONICS

Harmonics can increase RMS current and cause equipment heating, potentially reducing efficiency and lifespan.

## CABLE RESISTANCE HEAT LOSS

Every cable carrying current loses energy as heat ( $I^2R$  loss). Reducing load current or improving power factor can reduce this loss — but a passive device alone cannot change load current.

C-Results™ identifies and recovers all three loss sources simultaneously

HOW IT WORKS

# How the C-Results™ Energy Works

Self-Generating Frequency Technology – No External Power Required

## ⚡ ELECTRICAL LOSSES

**EMF**  
Electromagnetic interference

**Harmonics**  
Electrical noise & voltage distortion

**High Temperature**  
Energy wasted as cable heat

## C-Results™ Energy Patch *Self-Generating Frequency Core*

## ✓ RECOVERED ENERGY

**Reduced EMF**  
Cleaner electromagnetic environment

**Reduced Harmonics**  
Stable, clean power quality

**Reduced Temperature**  
Cables run cooler, less resistance

*“No external power. No rewiring. Just immediate, measurable recovery.”*

# C-Results™ System Features

The Energy Patch — Non-Invasive. Maintenance-Free. Immediately Effective.

## PROOF

### Instant Temperature Drop

Cable heat falls immediately upon installation – physical, measurable proof that energy losses are being recovered in real time.

**Measurable in Minutes**

## INSTALLATION

### Non-Invasive & Zero Maintenance

No rewiring. No machine changes. No breaker modifications. Install once and the system works silently for over 10 years.

**10+ Year Lifespan**

## GUARANTEE

### Guaranteed 5-20% kWh Reduction

Certified and measured savings on every electricity bill – starting from the first billing cycle after deployment.

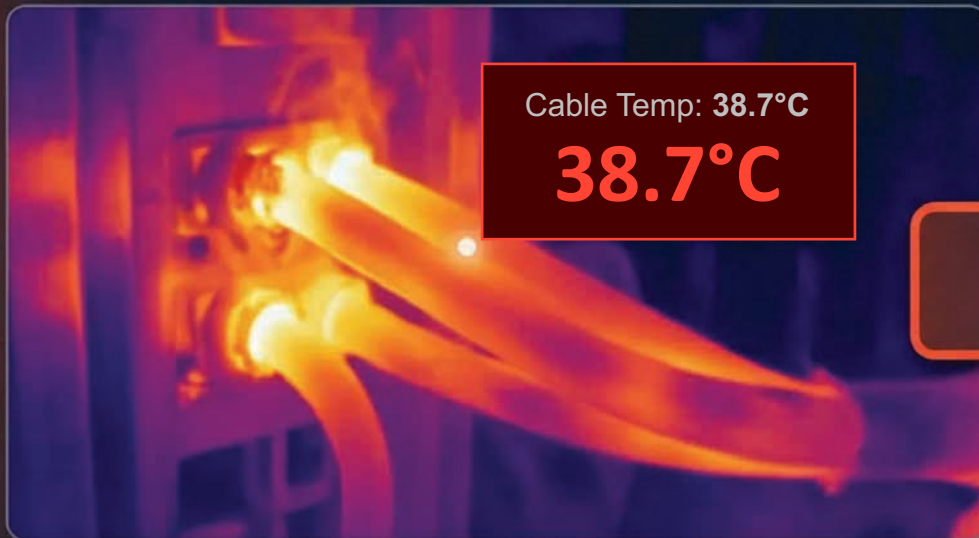

**SIRIM - IEC - UL Certified**

Zero disruption. Immediate, lasting savings.

# Lower Temperature = Recovered Losses

*Heat is wasted money. Eliminate the heat. Recover the profit.*

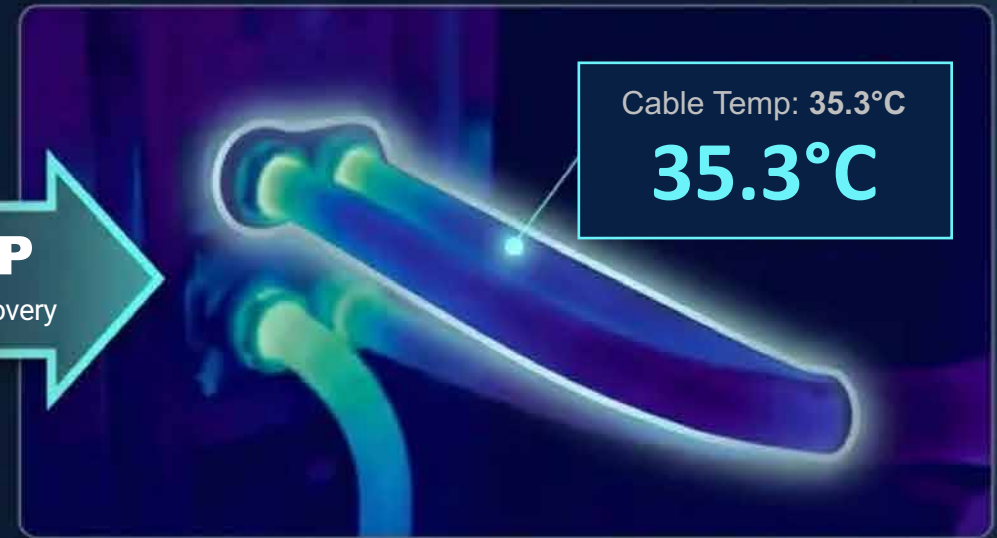

**✗ BEFORE** \*Without C-Results™ Energy Patch

## I<sup>2</sup>R Losses Active

Energy wasting as heat through cable resistance.  
*You are paying for this heat – not productivity.*

**✓ AFTER** \*With C-Results™ Energy Patch

## Losses Recovered

*Heat converted into usable electrical energy.*  
*Every degree drop is money returned to your bottom line.*

**3.4°C DROP**  
Immediate Energy Recovery

### Heat = Resistance

Cable resistance wastes power as heat

### Resistance = Lost Money

Every watt of heat is a watt you paid for but never used

### Less Heat = Recovered Profit

Lower temperature = lower kWh consumption = lower bill

# C-Results™

## Instant Temperature Drop

From **38.7°C**  
to **35.3°C**  
(8.8% reduction in temperature)

PROOF

### Instant Temperature Drop

Cable heat falls immediately upon installation – physical, measurable proof that energy losses are being recovered in real time.

Measurable in Minutes

Before C-Results™

After C-Results™

# GLOBALLY CERTIFIED. INDEPENDENTLY VERIFIED.

C-Results™ meets the world's most rigorous safety and performance standards.

\*Power Quality &  
EMF Reduction

\*Harmonic Emissions  
Standard

\*Safety &  
Performance

International  
Validation

International  
Validation

## SAFE

Independently tested and approved  
for commercial and industrial use

## PROVEN

Performance validated across multiple  
international standards bodies

## GLOBAL

Recognized across Asia-Pacific,  
Americas, and international markets

# Verified by Accredited Laboratories

## Independent Test Results

Test	Finding	Laboratory
Harmonic Reduction	Up to 11.6% reduction	UL, SIRIM, PTECP
Power Draw (Appliances)	Up to 5.6% reduction	UL (Singapore)
Electrical Safety	Certified	UL, SIRIM
Non-Ionizing Radiation	No emission detected	Malaysian Nuclear Agency

*"Lab results measured on appliances. Your facility savings verified on your meter before payment."*

# INDUSTRY APPLICATIONS

**Maximum Recovery Potential – Where C-Results™ Delivers Most**

**24/7 operations unlock the highest energy recovery – from min. 5% up to 20% savings from day one.**

**MANUFACTURING**  
Motors & Machinery  
Recovery: 10-20%

**COLD STORAGE**  
Compressors & Chillers  
Recovery: 10-20%

**COMMERCIAL KITCHENS**  
Ovens, Fans & HVAC  
Recovery: 10-15%

**OFFICE BUILDINGS**  
Lighting & Air Conditioning  
Recovery: 10-15%

**RETAIL & HOSPITALITY**  
Lighting & HVAC Systems  
Recovery: 10-15%

**24/7 Operations = Maximum Recovery Potential**

The longer your facility runs, the greater your savings. One installation. No downtime. Immediate results.

# One Fee. Fair. Transparent.

## Pricing Model

### Formula

#### Total Fee Formula

**Total Fee =  
1.5 × Monthly  
Electricity Bill**

### Example

#### RM100,000 / Month Bill

- Monthly bill: RM100,000  
→ Total fee: RM150,000 (one-time)
- **30% upfront: RM 45,000 ✓  
refundable**
- 70% balance: RM105,000  
(only if savings achieved)

### Savings Projection

10% Savings = RM10,000/month

- Payback:  
15 months to full recovery
- Then:  
Pure savings for  
10+ years

# THE FINANCIAL IMPACT

10-Year Savings Projection — One Investment. A Decade of Returns.

BASED ON RM 100,000 / MONTH ELECTRICITY BILL

YEAR-BY-YEAR CUMULATIVE SAVINGS GROWTH

CONSERVATIVE RECOVERY — 10%

RM 1.2M

\*Cumulative savings over 10 years\*

10% kWh Reduction

↑

24/7 OPERATIONS — 20%

RM 2.4M

\*Cumulative savings over 10 years\*

20% kWh Reduction

Hypothetical example only — not a guarantee.

At RM100,000/month bill, a **verified** 5% savings = RM5,000/month = RM60,000/year = RM600,000 over 10 years. Actual savings must be verified on your meter before payment.

## ONE-TIME INVESTMENT

No recurring costs. No maintenance fees.

## 10+ YEAR LIFESPAN

Returns compound every single month.

## ZERO OPERATIONAL CHANGES

No new machines. No rewiring. No downtime.

YOUR NEXT MOVE

# 3-Step Action Plan

Start recovering losses — today.

STEP 1

01

## ACKNOWLEDGE

5–20% of your current electricity bill is invisible waste. Recognize the loss before it compounds further.

STEP 2

02

## BRIEFING

Schedule a focused 30-minute technical session. Our engineers walk you through your specific site's recovery potential — no obligation.

STEP 3

03

## DEPLOY

Install the C-Results™ Energy Patch. Losses begin recovering immediately. Savings start from Day 1 — no disruption, no downtime.

**One decision. One installation. 10+ years of recovered profit.**

# What You Risk = Nothing

## Your Zero-Risk Path

✓ 12-month baseline analysis

FREE

✓ 3-month on-meter trial

AT OUR RISK

✓ Full refund if savings target not met

GUARANTEED

100% Refund

You only pay when we prove savings on YOUR meter.

# Frequently Asked Questions

## FAQ

Question	Answer
 Q: Is it safe?	A: Yes. Certified by SIRIM, UL, and Malaysian Nuclear Agency for safety and EMC.
 Q: Does it need electricity?	A: No. Passive technology — no external power required.
 Q: When do savings start?	A: Immediately after installation. Payment only starts after we prove savings.
 Q: What if savings are below target?	A: You pay nothing. 100% refund of upfront payment.

The device does not require external AC power. However, no passive device can actively correct power factor or harmonics without some form of energy exchange.

The device has received safety and EMC certifications from SIRIM, UL, and the Malaysian Nuclear Agency (for non-ionizing radiation only). Ask for certificate numbers.

THE COST OF WAITING

# Try C-Results™ With Zero Financial Risk

*One decision. Three months of monitoring.  
A decade of potential savings.*

The Technology  
Is Ready

The Certifications  
Are Complete

The Savings  
Start Immediately

**ACT NOW – RECOVER WHAT IS ALREADY YOURS**

Every day of inaction is a day of measurable loss.  
The C-Results™ system is installed, certified, and ready to deploy.

*Every day you wait is a day your losses continue. Every day you act is a day your savings begin.*
